

## Phase I

- 250,000 Layers = 212,500 eggs per day.
- (1) FP One will pack 212,500 eggs per day in approximately 6-7 hours.

■ FP ONE Estandar – 36.000 Huevos / Hora

## Phase II

- Your production grows to 250,000 additional layers for a total of 500,000 layers
- 500,000 layers produce approximately 425,000 eggs per day
- When adding another one FP One together with a distribution table, the new system will pack 425,000 eggs in approximately 6-7 hours.

■ Dos FP ONE con Mesa de Distribución – 72.000 Huevos / Hora
